

## ROSHAN KAKARLA

kakarlaroshan0401@gmail.com | +1 (309) 498-5532

---

### PROFESSIONAL SUMMARY

---

Software Engineer with 3+ years of experience developing scalable, secure applications using Java, Python, JavaScript, Angular, React, and Node.js. Strong expertise in REST API development, microservices, SQL/NoSQL databases, and cloud-native deployment (AWS/Azure). Proven track record improving application performance, accelerating delivery cycles through CI/CD pipelines, and ensuring high reliability with TDD and Agile practices. Adept at translating business requirements into efficient, maintainable code and cross-functional collaboration.

---

### TECHNICAL SKILLS

---

**Programming Languages:** Java, Python, JavaScript, TypeScript, SQL, C#

**Frameworks:** Spring Boot, Django, Flask, FastAPI, Angular, React.js, Node.js, Express.js

**Databases:** PostgreSQL, MySQL, MongoDB, Redis

**Cloud Platforms:** AWS (EC2, Lambda, RDS, S3), Azure

**DevOps Tools:** Docker, Jenkins, GitHub Actions, Terraform (basic)

**Testing Tools:** JUnit, PyTest, Selenium, Postman

**Methodologies:** Microservices, REST APIs, CI/CD, Agile/Scrum, TDD.

---

### EXPERIENCE

---

#### SOFTWARE DEVELOPER | TECHCORP | CLAYMONT, DE | OCT 2025 – PRESENT

- Developed full-stack features using Java Spring Boot, Angular, PostgreSQL, improving performance by 35%.
- Built and optimized RESTful microservices integrating multiple business systems.
- Deployed scalable services on AWS (EC2, Lambda) ensuring 99.9% uptime.
- Automated CI/CD workflows using Jenkins & GitHub Actions, reducing release cycles by 40%.
- Implemented JWT authentication and secure coding patterns for compliance.45%.

#### JR. SOFTWARE ENGINEER | TECHNOPRISM LLC | MESA, AZ | APR 2025 – OCT 2025

- Built Python/Node.js APIs for analytics platforms processing 10M+ daily events.
- Created Angular dashboards with real-time data synchronization.
- Optimized SQL and MongoDB queries reducing latency by 30%.
- Achieved 95% test coverage with JUnit, PyTest, Selenium.
- Supported AWS-based CI/CD pipelines for fast and reliable deployments.

#### SOFTWARE ENGINEER | COSMICVENT SOFTWARE | HYDERABAD | JAN 2019 – JUN 2021

- Developed backend services using Java Spring Boot and Python, boosting transaction throughput by 28%.
- Built secure REST APIs and integrated fraud/risk analytics microservices for real-time decisioning.
- Designed Angular/React dashboards and optimized PostgreSQL & MongoDB schemas, improving query speed by 32%.
- Implemented CI/CD pipelines with Jenkins, GitLab, and Docker, reducing deployment time by 40%.
- Ensured platform reliability with 96% of test, deployed secure cloud-native services on AWS (Lambda, EC2, S3, RDS).

#### SOFTWARE ENGINEER | COSMICVENT SOFTWARE | HYDERABAD | JAN 2019 – JUN 2021

- Built web applications using React.js, Flask, FastAPI, and PostgreSQL.
- Designed and implemented REST APIs supporting large-scale data workflows.
- Deployed containerized microservices on AWS & GCP, reaching 99.9% service uptime.
- Automated builds and deployments using Jenkins and Docker.

- Applied TDD and code review practices ensuring maintainable, high-quality code.
- Partnered with business teams to translate requirements into technical solutions.

---

## EDUCATION

---

- M.S. in Information Technology Management - Indiana Wesleyan University, IN | GPA: 3.66
